

ServerExperts LiveDrive (Virtual Drive Cloud Storage)

The Challenge

Your business depends on access to documents. Traditionally perhaps you have these documents on a laptop, workstation, or server. However those documents are difficult to access when you have employees that travel or when your office is virtual. Options for remote access such as VPN can be costly to setup and are sometimes blocked when at hotels or coffee shops. You need a way to share your documents and file/folder structure with your whole team, and from anywhere.

ServerExperts LiveDrive

Your solution is the powerful, cost-effective ServerExperts LiveDrive cloud-based virtual drive system. You likely have heard a little about cloud-based computing. The concept is that instead of a physical server where your data might live, you have a virtual drive hosted on a group of Internet servers that can be accessed from anywhere. With ServerExperts LiveDrive you have a file storage location on the Internet where you can organize files, collaborate, and even share files with vendors, clients, or others outside your business.

Features

ServerExperts LiveDrive provides the following benefits:

- Unlimited storage space
- No software licenses or additional hardware needed
- Access your files for the web, mobile or desktop software
- Drive-letter access from your Windows XP/Vista/7 machine, you access your ServerExperts LiveDrive just as you would a local harddrive or USB drive
- Web-based access including Word and Excel document editing for those times when you are using a kiosk, client computer, or shared workstation
- Document version control and backup allowing you to revert to earlier versions or restore from backup at the click of a mouse
- Select between a company login or a unique login for each user, a company login keeps things simple while unique logins provide user permissions
- Simple pricing based on the number of user logins you require
- 24 * 7 support from ServerExperts professionals who know your business

Pricing Tiers

A key advantage is that unlike our competitors, you are not limited on storage space and you will not be charged extra for the bandwidth you use. Pricing is determined by the number of users who have logins to the ServerExperts LiveDrive. For example if you want all your users on ServerExperts LiveDrive to have access to every file you could use a single login.. called a **company login**. If you require individual security to be placed on folders or files, you can assign individual logins... called a **unique login**.

- One-year term is required
 - User account creation is included, end-user training available at hourly rates
 - **Company Login - \$295 per year / Unique Up To 5 Users - \$495 per year**
- For a quote on access for 10, 15, or more unique logins please contact us!

Client Testimonials

"With LiveDrive, my staff and I can work with the applications we know and love but save everything in the cloud, knowing it is safe and accessible anywhere."

"I don't know how we survived without it. Every employee having access to everything everywhere.. that's how it should be."

"LiveDrive is exactly what we've been looking for. It has replaced a number of products we were using, saving us time and money."
